

NEW!

ORAJET® 3301F

Digital Printing Polyester

Digitally printable solution – also for doming labels

ORAJET® 3301F Digital Printing Polyester is the new favourite choice when it comes to chrome films. The material is digitally printable, making it perfect for labels where smaller volumes are needed for each type, but not only that – it has been specifically developed to work also for doming labels. Other applications include name tags and technical identification labels.

This top coated polyester film shows also excellent adhesion properties on apolar and structured substrates.

The material is available in chrome as well as brushed chrome, and is digitally printable with solvent based inks, as well as UV or Latex inks.

Product benefits include:

- Top coated digital printing film
- Suitable for labels incl. doming labels
- Available as chrome and brushed chrome
- suitable for apolar and structured substrates
- permanent adhesive with high initial tack
