

AR 4550

Broadband Antireflection single-layer coating for structured surfaces
Colour-neutral residual reflex

Principle curve: AR4550 on PMMA-plano surface, one sided (part thickness 2 mm)

Properties:

- reduced losses (reflection, stray light and absorption)
- abrasion resistant according to DIN EN ISO 2409 (cross hatch Tape-Test)
- climate resistant according to DIN EN ISO 9022-14-06 (5 cycles at 70°C to -40°C)
- climate resistant according to DIN EN ISO 9022-16-01 (5 cycles at 23°C / 40°C – 85% / 92% relative humidity)
- colour-neutral residual reflex

Engineered to Manage Light™
