

ORALITE® 5097 Astifol® Anti-Sticker Film

Cleaning of traffic signs which have been vandalized with application of stickers, is every year costing society a great deal. But it is not only costly – stickers applied to traffic signs will make the signs less clearly readable, and may result in dangerous situations in traffic.

With **ORALITE® 5097 Astifol® Anti-Sticker Film** applied to signage, both euros and efforts can be saved.

ORALITE® 5097 Astifol® Anti-Sticker Film is a protective surface laminate, which is applied to the sign surface. With its slightly textured structure, the laminate will enable a simple and residue-free removal of stickers.

Combined with selected ORALITE® reflective films, traffic signs laminated with ORALITE® 5097 Astifol® Anti-Sticker Film remain CE compliant, fulfilling all the requirements of EN 12899-1.

Product features and benefits include:

- Protection of printed and non-printed ORALITE® surfaces against application of stickers
- Intended for lamination of ORALITE® materials
- Fluoropolymeric film
- 250 micron
- Highly transparent
- 10 years durability
- Solvent polyacrylate, permanent adhesive
